March, 10, 1928.

Mr. Reed Jerman,
Office State Engineer,
Salt Lake City, Utah.

Dear Mr. Jerman:

The irrigation season will soon be here and I am writing you this letter personally because I think you are more familiar with the situation in regards to the Mary Demarco and Eleganti situation on Spring Canyon Wash than any other person in your office.

Last year, and in fact for many years, there has been considerable annoyance between these people in regards to the use of the water from that wash. It was that last year that your representative in this territory would keep things stright and see that each user received their portion of the water, but as you know there was much complaint on the part of Demarcos. I believe Mr. Jerman if you would come down, we could get the contending parties together and sign an agreement which would be binding to both parties with a penilty stipulated strong enough to keep them streight. I have gone into this matter very carefully from both angles and I am convenced that considerable partiality has been extended to the Eleganties. I hope I am wrong and can be convinced differently. I believe a water turn system can be worked out where each user will take the entire flow for a given number of days depending on their rights.

Let me hear from you regarding this and I will do all I can to help out.

Very truly yours,

Olson B. Madsen
County Agent.
